

## Self Tacking Jib Track System # 24920

This complete self tacking track and car system offers bespoke track curving to Customer's requirements. Originally developed as a replacement system for British Hunter sailboat owners, we are now offering the system to owners of yachts up to 36ft wanting to upgrade or convert their current jib arrangements.

The system comprises of:

1.8m Size 2 beam track, custom curved and cut to length, custom drilling offered.

Two short length Size 2 traveller cars with Delrin ball bearings and toggle fittings (can upgrade to Torlon).

Laser cut stainless steel link bar to connect the two traveller cars.

The system is very smooth running, robust and proven over many sea miles.

Customer needs to supply their own end fittings to mount on deck.

Barton part #24920

Available Globally through our network of distributors and Dealers.
