

Clear Wear Pads

Barton Marine stocks and supplies rectangular laser cut pads with high performance adhesive

Designed to help sailors and power boaters protect key areas of a boat's deck and superstructure from abrasion, chips, scuffs and wear, our range of wear pads can be applied wherever there is a need to protect a boat's finish without compromising its appearance. Originally developed as a surface protection for Formula One racing, this durable marine grade film is non yellowing and resistant to salt water degradation

- Highest protection for extreme use
- Fits both curved and flat surfaces
- Easy to fit
- UV resistant high bond 3M pressure sensitive backing
- Excellent resistance to edge lifting, immersion and exposure to salt water

Part Number:

67170 Rectangular (pack of 2)
