

Fuel Whistle

A simple device to prevent accidental spillages whilst refuelling

This unique patented product has been designed to give an audible warning to prevent fuel spills during the refuelling of boats. This helps prevent marine pollution and ensures that your topsides and decks are kept free from spills.

Until now, controlling these fuel spills has been difficult. Barton Marine has produced a simple and inexpensive fuel spill prevention device to warn that the fuel tank is approaching full without spilling a single drop of fuel.

With the 'Fuel Whistle', there will be no more guesswork, no waste, no spills and no pollution. Every boat-owner can be a partner in protecting our precious resources.

- Eco friendly
- Simple to fit
- Protects the environment and your deck
- Suitable for sail and power boats
- Fitting instructions included
- Cost-effective

Part Number: 60010
