

The Barton Furler Re-designed

Barton Marine's new design furler makes controlling the jib a breeze, thanks to its improved stainless steel guides designed to hold the line in place.

- Re-designed to enhance style and increase performance
- 3 point line retention
- Invisible, easy furling line attachment
- Multi-position line exit at 30, 90, 150, 215, 270 and 335 degree angles (bow facing)
- Furling line guides to eliminate line drop

The Barton furler is easy to self-fit onto dinghies, catamarans & day boats. The line attachment is invisible to see with the knot hidden inside the drum preventing any chance of it catching, wearing or working undone.

Barton Part Numbers:

42334 - 76mm - up to 60 sq. ft.

42335 - 95mm - up to 100 sq. ft.
